

FOR IMMEDIATE RELEASE

Quaker Plastics offers new BLUE LINER BEAD LOCK

Quaker Plastics, a manufacturer of custom thermoforming and extruded products, is now offering its popular liner bead lock in a BLUE color—to match today's popular pool liner patterns. The blue liner bead lock is made of flexible vinyl and designed to wedge/ shim into coping track just over the pool liner bead—to ensure the liner will never slip out! The new BLUE liner wedge lock is designed to match the latest vinyl liner pool patterns so it 'blends' better into the pattern. Plus this new wedge lock is made of all weather vinyl so it will last longer and look better over time. Vinyl liner pool installers will want to add this to their installation process. To get a sample of the new wedge lock, call 570-385-4733 or learn more at www.quakerplastic.com
